THANK  
YOU

#### To Our Clients & Partners,

We hope that you and those around you are remaining safe during these uncertain times. solutions4networks feels privileged to have you as a customer and, even in this unprecedented situation, are working hard to continue serving you as consistently as you have come to expect and rely on. Thank you for your business, your friendship, and your trust.

In this crisis, our top priority is the safety and well-being of those we work with and serve, including our customers, employees, suppliers, and partners. For that purpose, we have proactively instituted enhanced cleaning protocols in our office, adopted social distancing measures, and enforced remote working whenever possible. We have procured all necessary PPE to meet the needs of our employees

Thanks to years of experience and leading technology, our team is prepared to work from anywhere. However, we recognize that not every team is so robustly outfitted, which is why we stand ready and committed to providing uninterrupted service and necessary protection for our customers.

We are still available for you, conducting regular calls to discuss current and future needs, processing orders, shipping and supporting all of you via phone and UC platforms. Please call on us to assist you in any and every way. We will do our utmost to help you to the fullest extent possible.

Warm regards,

and clients.

Michele McGough, Founder & CEO

In most instances, we have canceled or postponed appearances at trade shows, travel, and in-person sales meetings to minimize direct personal contact to help keep everyone healthy.

## COVID-19 Partner Offers

### Cisco Pandemic Response Offers

- Cisco Umbrella protects users from malicious Internet destinations whether they are on or off the network.
- Duo Security enables organizations to verify users' identities and establish device trust before granting access to applications.
- Cisco AnyConnect Secure Mobility Client empowers employees to work from anywhere on company laptops or personal mobile devices.

### TASE Labs

- IoT Central – Getting Started with IOT in Your Organization - June 19, 2020
  - Register [here](#).
- Back2Business Virtual Conference - June 25, 2020

## Engineer Spotlight: Jeff Monaco

In May, Jeff celebrated 20 years with s4nets! He has been in the IT industry for over 40 years, and his first job involved programming on an IBM Series 1. To Jeff, the most interesting projects are ones that have an obvious, measurable, and positive impact on the client.

Outside of work, Jeff enjoys fishing, and said that his dream vacation would be Hawaii, for obvious reasons! One fun fact about Jeff is that he always carries a slide rule, and knows how to use it.

## Solution Highlight: DevNet & CML 2.0

Last year's Cisco Live! conference included a great deal of fanfare for network programmability, from the announcement of DevNet certification tracks, to showcasing emerging intent-based network capabilities. Since then, Cisco's DevNet site has undergone a significant expansion, including new training modules, video courses, and a code exchange program.

They have also rolled out several developer sandboxes and tutorials to familiarize developers and engineers with these new capabilities.

Cisco Modeling Lab 2.0 - Personal Version is a powerful new tool from Cisco that allows engineers to build virtual networks for instruction, change management, or proof-of-concept work. It provides an intuitive drag-and-drop interface that makes building complex topologies easy. Let's see just how easy it is to get a lab up and running with CML! Watch the video above to learn more about running Cisco Modeling Labs 2.0.

Josh Gilby, Senior Consulting Engineer

## For Fun

While spending time with your children is wonderful, sometimes parents just need a little break. Save some of your sanity with free Cisco coloring pages for your kids to enjoy!

## Partner Spotlight: TASE Labs, LLC.

solutions4networks is excited to announce that we have partnered with TASE Labs to expand the range of solutions and services offered to our clients.

The TASE in TASE Labs stands for “Technical Architecture Solution Engineering”. It is a local technology company with a technology/project-first mentality; setting it apart from other technology companies in the area. TASE Labs’ goal is to break the cycle of the traditional consultant-to-client relationship. They do this by providing technical architectures that align best practices and technical need, migration, and support services.

Their core specialties are the cloud, specifically Microsoft Azure, and Office 365.

Some of their popular offerings include Office 365 product enablement through Teams, PowerApps, Exchange Online, SharePoint, and more. In addition, they also specialize in Cloud security, best practices, and Cloud migrations. TASE Labs always aims to deliver beyond expectation.
